Graduate Studies at JCU

U.S. News & World Report consistently ranks JCU among the top universities in the Midwest offering master's degrees. We have a rich, 60-year tradition of graduate education and a strong Jesuit commitment to developing graduates who become leaders in their community.

We also provide personalized attention during the admissions process, significant tuition scholarships in many programs, and a student-centered learning environment with distinguished faculty and small class sizes.

Study Options

We offer both part- and full-time options for study, with courses available during the day and evening.

We also provide the flexibility for you to take up to two courses (six credits) as a non-degree seeking student before you formally enroll in a program.

Location

Located on a 60-acre campus in a suburb of Cleveland, John Carroll combines the advantage of urban living with a vibrant college community. The city offers major league sports, great restaurants and opportunities to engage the arts at University Circle – all within a half hour of campus.

How to Apply

Visit jcu.edu/graduate to complete our free online application. Applicants must also submit official transcripts from colleges and universities previously attended. (If you are a John Carroll graduate, your transcript will be accessed automatically.)

Specific programs may have additional application requirements, such as examination scores and letters of recommendation. Visit jcu.edu/graduate for complete application requirements for each program.

Our Admissions Process

The Office of Graduate Studies will forward your application and pertinent information directly to the appropriate academic department for evaluation. Upon the department's recommendation, you will be notified about the admission decision.

The application process takes approximately one month from the time all required material is received by the Office of Graduate Studies.

Qualified students may take up to six credits while awaiting the admission decision (at the recommendation of the program director and the permission of the Dean.)

Financial Assistance

The Office of Graduate Studies is dedicated to helping our students finance their graduate education. The following resources are available to help you on your way to joining us.

Tuition Scholarships

Significant scholarships that reduce tuition up to 40% are available for:

- Certified/licensed teachers
- Students pursuing teacher licensure
- Students in Nonprofit Administration, School Counseling, School Psychology, and Theology and Religious Studies

These scholarships reduce our tuition to a level comparable to surrounding public universities.

Graduate Assistantships

Many departments offer graduate assistantships that provide a full tuition waiver and a stipend.

Student Loans and Grants

The University's Office of Admissions and Financial Aid offers assistance on student loans and grants.

For more information about financial assistance, visit our website at www.jcu.edu/graduate.
