

Sogang STEM Lab Internship Program

Interns will have a hands-on learning experience through interactions with professors and graduate students.

Program Description:

School of Natural Sciences

Mathematics	Physics	Chemistry	Life Science
-------------	---------	-----------	--------------

School of Engineering

Electronic Engineering	Computer Science and Engineering	Chemical and Biomolecular Engineering	Mechanical Engineering
------------------------	----------------------------------	---------------------------------------	------------------------

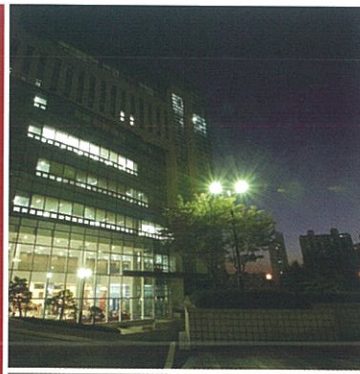

Undergraduate exchange students who are majoring in any of the listed areas can apply for an internship at one of the many research labs at Sogang University. Interns will have a hands-on learning experience through interactions with professors and graduate students. The internships will have flexible hours, with a maximum of five hours per week. Students will be assigned to a research lab based on the information in their Lab Internship Program applications.

Eligibility:

- Undergraduate exchange students to Sogang University.
- Students whose first majors are in Engineering or Sciences.
- Students who will successfully complete the course.
- Students who are recommended by the home university.

Interns will have a hands-on learning experience through interactions with professors and graduate students.

Application Checklist:

- Exchange student online application form: <http://goabroad.sogang.ac.kr/application/exchange/index.asp>
- Supporting documents for exchange student application
- Sogang STEM Laboratory Internship application form
- CV and Study Plan for Sogang STEM Laboratory Internship
- Recommendation letter from academic professor for participation in Sogang STEM Laboratory Internship.

APPLICATION DEADLINE

[Spring] November 10 [Fall] May 10
